

WOODEN GRILL BRUSH

with replaceable head

The products

Our goals

rethinking the optimal bristle pattern of a grill brush

- better cleaning efficiency

more sustainability

- sustainable materials
- less material
- product durability

ease of use

- long handle for leverage and anti-splash
- fits comfortably in your hand

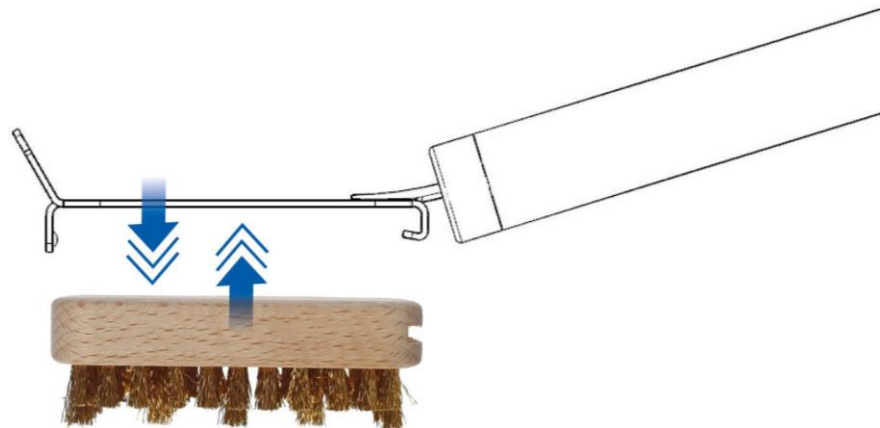

Usage

Optimal usage on:

- grillage
- gridle

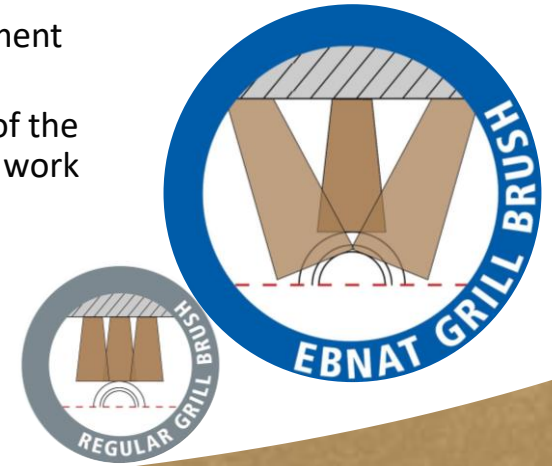

Unique benefits

- **Replacable** brush head
 - Easy changing with very little effort
- Stainless-steel **scraper edge**
 - Removes heavily burnt-in dirt

Unique benefits

- A specially designed brand new **step cut** ensures optimum cleaning performance.
 - **Angled**, slightly longer tufts of bristles **enclose** the grill bars
 - higher degree of efficiency than conventional grill brushes
- **Offset filament tufts** ensure that the grill bars do not get between the filament rows and the bristles thus “clean into the void”.
 - The grill bars are thus in contact with the tips and not with the sides of the bristle tufts. This allows the highly abrasive properties of the brass to work their magic.
- In addition, a **stronger filament** was chosen. This means that the brush can withstand even large forces during cleaning
 - bristles are prevented from being pressed apart

Grill brush

Product description

Wooden grill brush
with laser labeling, scraper edge and leather
band

Product packaging

1 piece in
white cardboard wrapper, 4-coloured print

Packaging unit (PU)

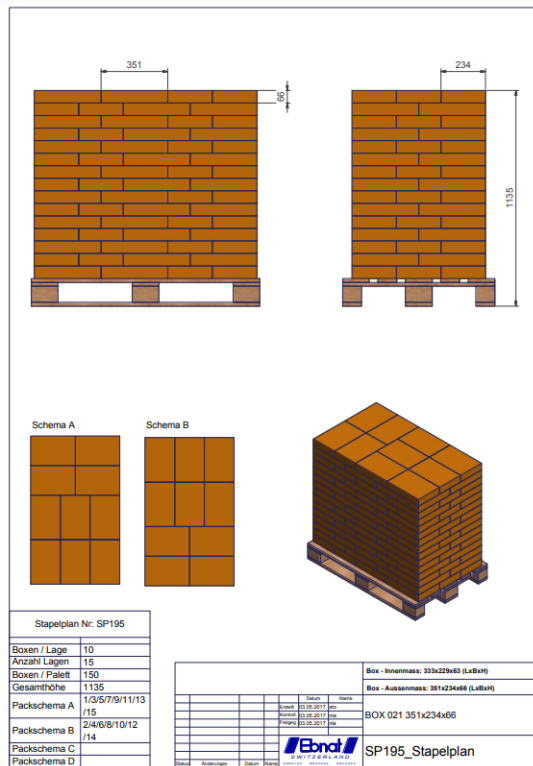

6 pieces in box

Price/pc. in EUR
